Pig and Point.

'American shooting men are much exercised over a story that a sporting farmer named Knittel, who lives near Brounsburg, St. Louis, has succeeded in teaching a pig to point game, and shoots over it. Our American friends have evidently forgotten the famous "pig pointer" which was trained to stand winged game and rabbits by the brothers Toomer, royal keepers in the New Forest. This "pig pointer" was a black sow whose intelligence and nose responded to a fortnight's training.-Bailly's Magazine.

Marriage Statistics.

The vital statistics prepared by City Clerk Entwisle, of Salem, Mass., shows that during 1907 there were 479 marriage licenses issued and 396 solemnized in the city, which is eighteen fewer than the previous year. The oldest bridegroom was sixty-eight and the oldest bride fifty, while the youngest bridegroom was sixteen and the youngest bride fifteen. Seventy-one brides were older than the bridegrooms.

The Fourteen Errors of Life.

The fourteen mistakes of life, Judge Rentoul told the Bartholomew

To expect to set up our own standard of right and wrong and expect everybody to conform to it.

To try to measure the enjoyment of others by own own.

To expect uniformity of opinion in this world.

To look for judgment and experience in youth.

To look for judgment and experience in youth. To endeavor to mold all disposi-

/ thons alike.

Not to yield to unimportant trifles. To look for perfection in our own actions.

To worry ourselves and others about what can not be remedied. Not to alleviate if we can all that

meds alleviation. Not to make allowances for the weaknesses of others.

To consider anything impossible that we can not ourselves perform. To believe only what our finite minds can grasp.

To live as if the moment, the time, the day were so important that it would live forever.

To estimate people by some out side quality, for it is that within which makes the man.-London Evening Standard.

Old Vegetables.

Garlic, onions, shallots and leeks have long been cultivated in almost all countries, and their origin is very uncertain. That of the scallion is better known. It grows spontaneously in Siberia. One finds chives in a wild state throughout the northern hemisphere.

THE STORY OF THE PEANUT SHELLS.

As everyone knows, C. W. Post, of Battle Creek, Michigan, is not only a maker of breakfast foods, but he is a strong individualist, who believes that the trades-unions are a menace to the liberty of the country.

Believing this, and being a "natural-born" scrapper for the right, as he sees it, Post, for several years past, has been engaged in a ceaseless warfare against "the Labor Trust," as he likes to call it.

Not being able to secure free and untrammeled expression of his opinions on this subject through the regular reading pages of the newspapers he has bought advertising space for this purpose, just as he is accustomed to for the telling of his Postum "story," and he has thus spent hundreds of thousands of dollars in denouncing trades-unionism.

As a result of Post's activities the people now know a whole lot about these organizations: how they are honeycombed with graft, how they answer was awaited. obstruct the development of legitimate business, curtail labor's output, | expecting and hoping for. Very carehold up manufacturers, graft upon their own membership, and rob the public. Naturally Post is hated by the trades-unionists, and intensely.

He employs no union labor, so they can not call out his men, and he defies their efforts at boycotting his products. The latest means of "getting" Post is the widespread publication of the story that a car which was recently wrecked in transmission was found to be loaded with empty peanut shells, which were being shipped from the South to Post's establishment at Battle Creek.

This canard probably originated with President John Fitzgerald, of the Chicago Federation of Labor, who, it is said, stated it publicly, as truth.

Post comes back and gives Fitzgerald the lie direct. He denounces Fitzgerald's statement as a deliberate falsehood, and underhanded and cowardly attempt to injure his business, having not the slightest basis in fact. As such an effort it must be regarded. It is significant that this statement about "the peanut shells" ls being given wide newspaper publicity. In the "patent inside" of an Eastern country paper 1 find it, and the inference naturally is that laborunionites are insidiously spreading this lie.

An institution (or a man) which will resort to moral intimidation and to physical force, that will destroy machinery and burn buildings, that will maim and kill if necessary to effects its ends, naturally would not hesitate to spread falsehood for the

same purposes. We admire Post. While we have no enmity toward labor unions, so long as they are conducted in an honest, "live-and-let-live" kind of a way. we have had enough of the tarred end of the stick to sympathize thoroughly with what he is trying to do. He deserves support. A man like Post can not be killed, even with lies. They are a boomerang every time. 'Again we know, for hasn't this weapon, every weapon that could be thought of, been used (and not simply by labor unions) to put us out of

business, too? I am going to drink two cups of Postum every morning from this time on, and put myself on a diet of Grape-Nuts. Bully for Post!-Editorial in The American Journal of Clinical Medicine,

Invalid, Yet a Wage-Earner.

valid women take pride in earning ning. their own pocket money and sometimes even their own living. One New York State who is so lame as of little girls to sew and mend, says own. the New York Sun.

It was pupils that I now am considering takthe last week, in November that I ing them again next year for the purwanted them to help me dress twenty-one dolls that I intended present- needlework. When they finish that ing to a mission Sunday school for its Christmas tree,

"There may have been one or two who didn't like the idea of spending the afternoon sewing, but if so they were soon won over by the enthusiasm of the majority. I had all the garments cut out with a threaded needle stuck in each set, and each set with the do! which was to wear it lying peacefully beneath the pile. I planned the party to last two hours and at the end of that time our one maid of all work appeared at the door with a large covered tray.

"Of course this was another cause for excitement. The tray was placed on a table at my elbow and when I removed the cover there were tea pils are planning to make. That cakes and little cups of custard with makes it necessary for me to keep up a spoonful of whipped cream for each little seamstress.

"While they were all delighted and scraped their cups pretty clean I no- grown-up visitors. It has now beticed that the majority were anxious to finish that they might get back to friends to consult me about their new work on their doll clothes. Knowing dresses before they take the cloth to that they would be more interested the dressmaker. in making the doll's dress than its undergarments, I had stated at first that the dress was to be left for the last.

"If you could have seen those little fingers fly trying to finish the undergarments in time at least to begin the dress that afternoon! That was quite impossible, however, even with the larger girls who had had some experience with the needle, and when time came for them to go, instead of my having to urge them to return the next week to finish the sewing they all begged to be allowed to come.

"Many of them wanted to come Monday after school, but I insisted that they wait until Saturday. At least half an hour before the appointed time they were all seated in my sitting room working for dear life. That day all the dresses were begun, but none of them was finished. On the third Saturday all the dresses were finished.

"Those who got through first turned in and helped the little tots, When he got ready to leave he sought who of course had less experience. Each garment had been inspected by me, and on many of them I had done considerable of the work, but when one remembers that the youngest of my guests were less than five it would er, bowing. be only natural for me to give them some help to keep them from becoming discouraged.

"When the last doll was dressed and packed away ready to be sent to the Sunday-school several of the larger girls asked me if I wasn't going to get more to dress. You should have seen the anxiety with which my

"That was the moment I had been fully I explained that while I would not have any more dolls to dress for the mission school I had determined to open a sewing class to begin the first Saturday after the new year. I went into my plans, explaining my charges for the course of sewing and mending, and what I expected my pupils to accomplish.

"Every one of the twenty was eager to have her name enrolled at once, but I explained that they must first consult their mothers. You know how impatient children are once they get a notion in their heads. That night we had a stream of visitors, the parents coming to ask about my sewing class.

"Following the suggestion of my mother I made my age limit from six to ten, and had it distinctly understood that each child was to be furnished with her own sewing box and is best for me not to try to overtax my strength.

"I begin with threading the needle and taking the simplest stitches. My most advanced pupils, those who have three years, make many of their own house boys Knife, Fork and Spoon been taught. But I never could quite been coming to me now for nearly garments. One little girl, who is now nine, has just finished a full set Watch, Carriage, and Matchbox were It is apt to be weird. of clothes for her baby brother. While they are far from perfect, they are much better made and fitted than the work done by the average cheap sewing woman, and a dozen times better than those to be had in our stores.

"It is not wise, according to my experience, to start a child on a useless bit of cloth just for the purpose of teaching her the stitches. Even my youngest pupils begin on some garments for their dolls. The fact that it is a garment holds their attention, and makes them eager to finish it and put it on the doll.

"From dolls the natural step is to makes garments for themselves or some member of their household. As a rule they all make some one or two articles for their mothers before they finish their first course of lessons.

"One feature that has proved both interesting and instructive was an exhibit which I held last season of the work of my classes. It comprised not only the work they were then do-
